Career Objective

- B.Tech CSE student specializing in backend development with Java, Spring Boot, and REST APIs. Skilled in MySQL/MongoDB and cloud integration, eager to deliver efficient server-side solutions..

Internships

GLA Immersion Training

June 2022 – July 2022

- Collaborated on group tasks during the GLA immersion program, enhancing team leadership and coordination skills.

Projects

HireMe | SpringBoot Application

- Working on backend services for a multi-platform service booking app using **Spring Boot**, **Hibernate**, and **MySQL**, enabling customer-provider connections (plumbing, electrician, etc.).
- Collaborated in a 3-member team, ensuring smooth integration between backend, web, and Android modules.

GLAXY (Social media app) | Flutter Based App

- Developed an intuitive Android app to help students connect to each other.

Waves Of Food| Android APP| Kotlin

- Developed **Waves of Food**, a real-time multi-vendor food delivery Android app using **Kotlin** and **MVVM architecture** for clean, maintainable code.
- Integrated **Firestore Authentication**, **Realtime Database**, and **Cloud Storage** to enable secure user login, instant data sync, and image hosting for menus and profiles.

Education

- **GL Bajaj Group of institutions, Mathura - Dr. A.P.J. Abdul Kalam Technical University**
Bachelor of Technology in Computer Science and Engineering 2023 - 2026
- **G.L.A University**
Diploma in Computer Science and Engineering 2020 – 2023
- **UP Board**
Intermediate 2019 – 2020
High School 2017 - 2018

Skills

- **Languages:** Java, C, Kotlin, Dart, JavaScript
- **Frameworks:** Flutter, Spring Boot, Hibernate
- **Databases:** MySQL, MongoDB, Firebase
- **Tools:** Android Studio, AWS, Git, CI/CD, Docker, Kubernetes
- **Others:** REST API, XML, Agile methodology, API Integration, Microservices,Kafka

Certifications & Workshops

- Completed **JP Morgan Software Engineering Virtual Experience** via Forage (Apr–Jun 2025) – built Project Midas using Kafka, H2, and REST APIs.
- Earned **CCNA v7** certification from **CISCO**, gaining comprehensive knowledge in switching, routing, and wireless essentials.
- Participated in a one-day workshop titled "**Let's Hack**" on Cyber Security. explored the Metasploit framework.
